

APPENDIX B

Projects requiring a Community and Environmental Assessment Process (CEAP)

PROJECTS RECOMMENDED FOR A COMMUNITY AND ENVIRONMENTAL ASSESSMENT PROCESS (CEAP)

The following capital improvement projects proposed for funding in the 2012-2017 CIP are recommended to complete a Community and Environmental Assessment Process (CEAP).

CEAP findings are submitted by departments to their respective advisory board for review as part of CIP project approval, and City Council has the opportunity to call up projects for their review and approval. (For those departments that do not have an advisory board, Planning Board is responsible for reviewing CEAP findings as part of project approval.) Many of these projects have either completed a CEAP or have been previously recommended to complete one, and several are underway.

Parks and Recreation Department

Elks Neighborhood Park (*in conjunction with Fourmile Canyon Creek Flood Mitigation*) (Page 94)

Open Space & Mountain Parks Department

Historical Structures and Trails – Stabilization & Restoration * (Page 70)
Visitor Infrastructure – System Wide * (Page 76)
SH93 Underpass at Community Ditch Trail (Page 75)

Transportation Division

28th Street (Baseline to Iris) (*CEAP completed 2001*) (Page 122-123)
28th St. Path Improvements: Iris to Yarmouth (Page 124)
Baseline Underpass: Broadway to 28th (Page 125)
Diagonal Hwy Reconstruction: 28th St. to 30th St. (Page 136)
Pearl Parkway Multi-Use Path: 30th to Foothills (Page 139)

Utilities Division/Tributary Greenways

Wonderland Creek Flood Mitigation (Page 178)
South Boulder Creek Flood Mitigation Improvements (Page 171)
Fourmile Canyon Creek Flood Mitigation Improvements (Page 169)
Upper Goose Creek Drainage Improvements (Page 176)
Barker Dam Hydro (Page 201)

**As the scope of work is defined the necessity of a CEAP or other public review will be determined.*
