

# CONSTRUCTION MITIGATION TECHNIQUES

## Construction Impacts:

- The Project Team is striving to minimize the overall construction period to the extent practical, as well as minimize the construction area disturbance.
  - The project will mostly be constructed in segments.
  - Incentives and disincentives are included in the contract with the general contractor.
  - City staff will continue to collaborate with the contractor during construction to determine the best ways to reduce both time and money with the construction implementation.

## The Best Ways to Lessen the Impacts to You:

- Stay Informed
  - The Project Web page will contain current information about traffic impacts and the project in general - The address is: [www.bouldertransportation.net](http://www.bouldertransportation.net), click on "Projects" and then click on "Broadway Project."
    - Weekly updates will be sent via email and press releases.
    - Sign up for the email group on the Project Web page.
- Consider other options
  - Take the **SKIP** for quick and efficient trips up and down Broadway. The trip is free if you have an Eco Pass. Cash fare is \$2 each way and \$1 for students. Monthly passes and 10-ride ticket books are also available.
    - Explore commuter trip reduction (CTR) strategies for your business, call (303) 441-1832.
    - Walk or bike (13<sup>th</sup> Street & 9<sup>th</sup> Street - bike corridors)
    - Carpool with co-workers or neighbors
    - Telework from home
    - Work flexible hours or a compressed work week
    - Use alternative arterial routes such as Foothills Parkway, 28<sup>th</sup> Street or Folsom for thru-city travel.
    - Do all your errands, trips and meetings at once to reduce your impact and the amount of time you need to spend navigating the construction.
- Other ideas – Share your successes with us so we can share the helpful news with others – For more info, go to the project web page
