

Stormwater Protection for Special Events

Grease Management

- Have spill clean up material on hand at all times.
- Clean up spills immediately.
- Protect the ground under and around your deep fryer using cardboard or a tarp.
- Properly dispose of all grease into an approved tallow bin. This may require you to bring the grease back to your facility.

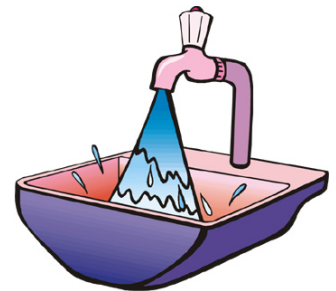

General

- Do not dump any liquids or other material outside.
- Do not wash out any containers unless water is collected and disposed to sanitary sewer.

Wastewater

- Do not pour on the ground or in a storm drain. Ask the event coordinator if there are approved containers or if there is a sink plumbed to a sanitary drain on-site.

Waste Management and Disposal

- Keep all lids closed unless adding waste.
- No liquids should be placed in waste receptacles.
